PacketFront Software Solutions and Radius Synergies (P) Ltd. sign a long term strategic tie up for development of Xenia^{TM} platform based on PacketFront BECS^{tm} OSS/BSS system to support M2M and Open Access FTTx network

Stockholm and New Delhi, 2013-02-18, PacketFront Software Solutions and Radius Synergies Private Limited (RSPL) have signed a Supply, Product Development and a Market co-operation agreement.

The contract includes a joint OSS/BSS product development program to create a complete Solution for Open Access FTTx networks and Machine-to-Machine Communications covering all aspects of the roll-out and deployment, service Fulfillment and Assurance products & applications. The Solution is built around PacketFront Software Solution's renowned BECS^{TM} product family for Network and Service provisioning and device connection & service delivery platform for M2M communication from Radius.

The first deployment of this solution shall be in Radius' India network , the largest FTTx network in India. The solution is expected to support more than one million connected devices by 2015.

"This is a major break-through for us in a number of ways" says Ulf Avrin, CEO PacketFront Software Solutions AB. "Not only is this a significant contract in size, but our BECS^{TM} complemented with Radius' Xenia^{TM} platform enables us to extend our business in Asia and other emerging markets. We see Radius as an excellent partner to address this fast growing open access FTTx & M2M market.

"Our aim is to take the solution to operational status as soon as possible in order to facilitate Radius' aggressive FTTx & M2M build-out. However, we see this as merely a beginning of a long journey. The demand for fast open access broadband and M2M communications is increasing not only in India, but across the globe. Together with Packetfront Software Solutions we can offer a complete turn-key solution including both products and services. We are in discussions with a number of potential customers to bring the solution to the global arena" says HS Singh, MD Radius Synergies (P) Ltd.

PacketFront Software Solutions delivers automates broadband network management since 2001 through the BECSTM platform. BECS provides zero touch configurations and automated service provisioning for any hardware and topology. Our active API enables easy and flexible integration to existing OSS/BSS systems. 100 operator customers in 22 countries have chosen BECSTM for efficient network operations.
