

## *PacketFront Software introduces support for Alcatel-Lucent products*

**Stockholm 2014-03-11**, PacketFront Software announced today further development of the BECS network management tool. Alcatel-Lucent is now added to the list of supported vendors, which already includes companies such as Juniper, Cisco, Huawei, Extreme and more. The first supported Alcatel-Lucent products are the ISAM 7360 GPON OLT and the OmniSwitch 6400 and 6850 Access Switch families.

The addition of Alcatel-Lucent products further strengthens BECS capabilities to support topology and hardware independent end-to-end network automation across Core and Access networks.

### *PacketFront Software*

*PacketFront Software's BECS platform delivers automated network management since 2001. BECS provides zero touch configuration, automated and programmable network configuration and service provisioning for any hardware and topology. Our active API enables easy and flexible integration to existing OSS/BSS systems. 100 operator customers in 23 countries have chosen BECS for efficient network operations.
