

PacketFront Software chosen as a 2013 Red Herring Top 100 Europe

Stockholm 2013-04-15, Red Herring announced its Top 100 award winners last week, recognizing Europe's leading private companies and celebrating these startups' innovations and technologies across their respective industries.

Red Herring's Top 100 Europe list has become a mark of distinction for identifying promising new companies and entrepreneurs. Red Herring's editors were among the first to recognize that companies such as Facebook, Twitter, Google, Yahoo, Skype, Salesforce.com, YouTube, and eBay would change the way we live and work.

"Selecting startups that show the most potential for disruption and growth is never easy," said Alex Vieux, publisher and CEO of Red Herring. "We looked at hundreds and hundreds of candidates from all across the continent, and after much thought and debate, narrowed the list down to the Top 100 Winners. Each year, the competition gets tougher but we believe PacketFront Software demonstrates the vision, drive and innovation that define a Red Herring winner."

Ulf Avrin, CEO of PacketFront Software says: "I was impressed by the quality of all the companies that were competing at the Red Herring Top 100 Europe Finals event in Amsterdam. Europe has some really strong companies in the shaping and it makes me extremely proud that PacketFront Software is seen as one of the top of these top companies."

PacketFront Software

PacketFront Software delivers automated broadband network management since 2001 through the BECS platform. BECS provides zero touch configuration and automated service provisioning for any hardware and topology. Our active API enables easy and flexible integration to existing OSS/BSS systems. 100 operator customers in 23 countries have chosen BECS for efficient network operations.
